

# WordPress Developer

We are looking to hire a skilled WordPress developer to design and implement attractive and functional websites for our clients. You will be responsible for both back-end and front-end development including the implementation of WordPress themes and plugins as well as site integration and security updates.

To be a successful WordPress developer, you should have in-depth knowledge of front-end programming languages, a good eye for aesthetics, and strong content management skills. Ultimately, a top-class WordPress developer can create attractive, user-friendly websites that perfectly meet the design and functionality specifications of the client.

## WordPress Developer duties and responsibilities

- Meeting with clients to discuss website design and function.
- Designing and building the website front-end.
- Creating the website architecture.
- Designing and managing the website back-end including database and server integration.
- Generating WordPress themes and plugins.
- Conducting website performance tests.
- Troubleshooting content issues.
- Conducting WordPress training with the client.
- Monitoring the performance of the live website.

## WordPress Developer requirements and qualifications

- Bachelor's degree in computer science or a similar field.
- Proven work experience as a WordPress developer, between 1-2 years.
- Knowledge of front-end technologies including CSS3, JavaScript, HTML5, and jQuery.
- Experience working with debugging tools such as Chrome Inspector and Firebug.
- Good understanding of website architecture and aesthetics.
- Ability to manage projects.
- Good communication skills.
- Ability to meet deadlines.

## Languages:

- Fluent English is required
- Other European language is a plus

*IMPORTANT NOTICE: This vacant position is strictly for Lebanese applicants*
